

Basic Programming

1. What is the data type usually used arithmetic operation?
int, float, double
2. What is the data type usually used in word and character?
char, String

3. What is the output of code below

```
class area {  
    public static void main(String[] args) {  
        int a = 100 + 3 * 5 - 10 / 5;  
        System.out.println(a);  
    }  
}
```

Output: 113

4. What is the output of code below

```
class average {  
    public static void main(String[] args) {  
        int a = 0;  
        for (int i=0; i<6 ; ++i) {  
            a = a + 2;  
        }  
        System.out.println(a/6);  
    }  
}
```

Output: 2

5. What is the output of code below

```
public class Question3 {  
    public static void main(String[] args) {  
        String name, address;  
        name = "Jack Donovan";  
        address = "3566 Golden Street Miami";  
        System.out.println(address.replace(" ", ""));  
    }  
}
```

Output: 3566GoldenStreetMiami
